

Required ADMET studies for Preclinical Entry – LMT837

Category	Study		Status	Category	Study		Status
DMPK	Absorption	• Cell perm. & P-gp substrate	Planned	SnT	General Toxicity	• Rodent single dose toxicity	Planned
		• Mouse PK (IV&PO)	Completed			• Rodent 5-day repeated dose toxicity	-
		• Rat PK (IV&PO)	Completed			• Rodent 14-day repeated dose toxicity + TK	Completed (w/o TK)
		• Dog PK (IV&PO)	Completed			• Non-rodent dose escalation toxicity	Completed
		• Monkey PK (IV&PO)	-		Genotoxicity	• Ames (or mini-Ames)	Planned
	Distribution	• BBB	Completed			• In vitro MN or CA	Completed (CA)
		• Brain tissue binding	Planned			• In vivo MN (rodent)	Planned (mini-Comet completed)
		• Plasma protein binding (H/M/R/D/P)	Completed (H/M/R/D)		CV safety	• hERG assay	Planned
	Metabolism	• Liver microsome stability (H/M/R/D/P)	Completed			• Cardiac ion channel(Nav1.5, Cav1.2)	Planned
		• Hepatocyte clearance (M/R/D/P/H)	Planned			• in silico APD prediction	Planned
		• Metabolite PF/in vitro Met ID (M/R/D/P/H)	Completed (Met PF)			• MEA (multiple electrode array)	Planned
	DDI	• Microsomal protein binding	Planned				
		• CYP Inhibition / Induction	Completed (CYP inhib.)				
		• Reaction phenotyping	Planned				
	Human PK Prediction		Planned
